

**Standard Pilaster Heights ( H )**

- 5"
- 9"
- 13"

- ① Fasten joggle strip to column ensuring that it is straight and level.
- ② Slide top flange of corner pilasters into joggle strip then fasten bottom flange into wall / column.
- ③ Cut pilaster (if necessary) on width and depth to fit column. Note, best to cut pilaster slightly small to avoid interferences.
- ④ Add trim pieces, by sliding top flange into joggle strip and securing bottom flange into wall / column.
